

## Dr. Kevon Dindial

***Dr. Kevon Dindial is a consultant paediatric haematologist/oncologist at the Eric Williams Medical Sciences Complex. He is the SickKids-Caribbean Initiative (SCI) co-lead physician for Trinidad and Tobago, serves as the PRO for the Trinidad and Tobago Society for Haematology and Blood Transfusion (TTSHBT) and is also a member of the National Cancer Control Coordinating Committee (NCCC) of Trinidad and Tobago.***

***Dr. Dindial has the experience and vested interest in improving the quality of care at a national level. He is invested in tackling fair and equitable treatment to all doctors particularly focusing on ensuring there are multiple avenues for registration to the specialist pathway. There must be multiple pathways that are attainable in an appropriate time frame as many persons have sacrificed time, family and money for both self and national development and this must not be undermined. Additionally, he is motivated to ensure there are systems in place to ensure accountability and transparency at all levels of the medical field. Furthermore, he is keen on being a voice in advocating for increased wages. I humbly ask for your support as a vote for me is a vote for a fair and secured future of the medical fraternity and your family! Thank you.***
